GREENOVATORS HACKATHON

ON

“WASTE TO WEALTH, SMART & SUSTAINABLE INFRASTRUCTURE & NET ZERO AI ARCHITECTURE”

7th – 9th October 2026

Greenovators Hackathon 2026

Waste To Wealth Smart & Sustainable Infrastructure Net Zero AI Architecture

1. Introduction

The National Greenovators Hackathon 2026 is a platform for students, researchers, startups, and young innovators to develop practical, technology-driven solutions to pressing environmental and urban sustainability challenges. The hackathon focuses on transforming ideas into scalable solutions through innovation, interdisciplinary collaboration, and expert mentorship.

The hackathon addresses three key themes:

Waste to Wealth – Converting waste into valuable resources through recycling, upcycling, and circular economy approaches.

Smart & Sustainable Infrastructure – Developing climate-resilient, energy-efficient, inclusive, and technology-enabled urban infrastructure.

Net Zero AI Architecture – Applying AI, ML, and data analytics to reduce emissions, optimize resources, and accelerate pathways to net-zero.

The initiative supports SDGs 7, 9, 11, 12, and 13, contributing to India’s vision of a sustainable, resilient, and resource-efficient future.

2. Objectives

- Promote innovation in waste management and circular economy.
- Develop smart, climate-resilient infrastructure.
- Apply AI/ML for energy efficiency and net-zero solutions.
- Connect academia, industry, policymakers, and innovators.
- Encourage scalable and commercially viable solutions.

3. Participants

Students, research scholars, startups, innovators, multidisciplinary teams, NGOs, and community organizations.

“WASTE TO WEALTH, SMART & SUSTAINABLE INFRASTRUCTURE & NET ZERO AI ARCHITECTURE”

7th – 9th October 2026

4. Key Problem Areas

A. Waste to Wealth

- Recycling, upcycling, and waste-to-resource technologies.
- Conversion of municipal, agricultural, and e-waste into valuable products.
- Smart waste management and sustainable packaging.

B. Smart & Sustainable Infrastructure

- Climate-resilient and energy-efficient infrastructure.
- Smart mobility, urban farming, and green infrastructure.
- AI/IoT-based monitoring of urban water, waste, and air quality.

C. Net Zero AI Architecture

- AI-based carbon monitoring and emission prediction.
- Renewable energy and resource optimization.
- Digital twins and AI solutions for low-carbon development.
- Expected Outcomes: Prototypes, digital tools, dashboards, and scalable sustainability solutions.

5. Hackathon Structure

Phase 1 – Applications

- Online registration and screening based on innovation, feasibility, scalability, and impact.

Phase 2 – 3-Day Hackathon

- Day 1: Orientation, problem briefing, and mentoring.
- Day 2: Design, prototype development, and expert guidance.
- Day 3: Final pitching, demonstration, and jury evaluation.

Phase 3 – Post-Hackathon

- Mentoring, seed-funding support, incubation, and industry linkages for selected teams.

“WASTE TO WEALTH, SMART & SUSTAINABLE INFRASTRUCTURE & NET ZERO AI ARCHITECTURE”

7th – 9th October 2026

6. Partnerships & Collaborations

- **Academic Institutions:** Amity University, IITs/NITs, and other partner universities.
- **Industry Partners:** Waste management companies, smart city consultants, renewable energy firms.
- **Government Bodies:** Ministry of Environment, Ministry of Housing & Urban Affairs, and Smart Cities Mission.
- **NGOs & International Agencies:** UNDP, UNEP, and local NGOs working in sustainability.

6. Expected Outcomes & Impact

- **Innovative Solutions:** At least 30+ scalable prototypes addressing waste, smart cities, and NET ZERO AI ARCHITECTURE.
- **Capacity Building:** Training 250+ students and young professionals in sustainable innovation and digital technologies.
- **Policy Alignment:** Recommendations for integration into waste management, AI governance, and urban planning strategies.
- **Societal Impact:** Cleaner cities, reduced emissions, improved quality of urban life, and a digitally enabled low-carbon transition.

9. Alignment with SDGs

- SDG 11: Sustainable Cities and Communities.
- SDG 12: Responsible Consumption and Production.
- SDG 13: Climate Action.
- SDG 9: Industry, Innovation, and Infrastructure.

An innovative effort to unite innovators, entrepreneurs, and stakeholders in the creation of sustainable urban futures is the Greenovators Hackathon 2026. The event's focus on Waste to Wealth and Smart & Sustainable Infrastructure aims to promote a culture of accountability, creativity, and teamwork in addition to generating innovative solutions.

Event Coordinator: **Prof. (Dr.) Renu Dhupper**, HoD,
Department of Climate Change and Environmental Sustainability,
Mob: 9810804964, Email: rdhupper@amity.edu

Core Team: Dr. Richa Nagar	– Asst. Professor
Dr. Manoj Chandra Garg	– Asst. Professor
Dr. Lolita Pradhan	– Asst. Professor
Dr. M.P Raju	– Asst. Professor
Dr. Anamika Shrivastava	– Asst. Professor
Dr. Rakesh Tiwari	– Asst. Professor
Dr. Harshita Jain	– Asst. Professor
Dr. Amrik Bhattacharya	– Asst. Professor
Dr. Manish Kumar	– Asst. Professor

Office Staff: Mr. Naresh Kumar
